Project Information

Please respond to the questions below as clear and concise as possible. Use additional pages if more room is needed.

1. Do you have a rainwater harvesting or other water conservation system? Describe it and how it helps conserve groundwater and/or surface water by reducing your dependency on conventional water systems?

3. Describe the originality, innovation, and/or uniqueness of your system. If specifications are applicable, please include them. (i.e collection size, storage capacity, etc.)

Please submit this application, along with digital photos (a minimum of 5 and a maximum of 10; minimum 300 dpi) and additional description pages to: Admin@ComalTrinityGCD.com.
